

# NÓTT RUNES NFT PLATFORM

Next-Generation NFT Solution

Whitepaper

v0.1.0

(April 2022)

# DISCLAIMER

This document provides an initial summary of the Nott Runes project. As the project proceeds, this document is expected to evolve over time. The Nott Runes team may post modifications, revisions, and/or updated drafts until the final document is presented prior to the date of the public beta.

This whitepaper sets forth a description of the planned use of the Nott token. This is being provided for information purposes only and is not a binding legal agreement. The Nott Runes beta will be governed by separate terms & conditions.

In the event of a conflict between the terms & conditions and this whitepaper, the terms & conditions govern. This whitepaper is not an offering document or prospectus, and is not intended to provide the basis of any investment decision or contract.

# 1 PURPOSE

Most NFTs these days, don't carry any value other than themselves, and owning an asset like an image/gif/... doesn't come with many other benefits. Although they're popular, the space for the real valuable NFTs feels empty and unattended.

Nott NFT Platform is mainly focused on NFTs that come with additional benefits and are consumable in different places. Like discounts, promos, achievements, tickets, ... that come with separate values and are actually usable stuff.

Companies and Providers could use our NFT SDK and provide those services and rights as NFTs.

To start, the Platform will include 96 Rune NFTs. A portion of Fees earned from NFT transactions will be divided among whom hold Rune NFTs.

Common Rune  
yields 1x

Rare Rune  
yields 2x

Mythical Rune  
yields 5x

## 2 NOTT TOKEN

We introduce Nott Token, our platform's main utility token. It will be a fungible token that powers different parts of the platform. The main use-cases will be:

**Marketplace's Main Currency** Nott Token will be the main currency of our marketplace and It will come with fee and price reduction, other currencies will be introduced with extra fees.

**Governance Token** Our platform will become a DAO and the Nott Token will be used as the voting rights of users for proposals. The final goal is to be governed by the community It will be managed by a global community of Nott token holders and delegates

Nott will be mainly deployed on **TON Blockchain** and In the future if It's needed it will operate as a cross-chain platform.

### Why TON?

- Being fast, secure, and scalable with Low TX fees
- Strong Smart Contract Capabilities
- Fresh ecosystem
- Lack of NFT Marketplace and a DAO in the TON Ecosystem

### 3 NFT MARKETPLACE AND NOTT RUNES

Nott NFT Marketplace will be an easy-to-use platform to mint, sell, and auction individual NFTs and NFT Collections.

Our marketplace will be introduced with 96 native NFTs named Nott Runes. These NFTs come with additional benefits of earning the marketplace fees. They will have three types: Common, Rare, and Mythical. Yields of each type will be different. Each Type will contain 32 NFTs.

Common Rune  
yields 1x

Rare Rune  
yields 2x

Mythical Rune  
yields 5x

All NFT transactions will be introduced with platform fees, which part of the fees will be divided among the holders of Nott Runes proportionally. For example, If you own 1 Rare Rune and 2 Common Runes, You'll have a share of 4 from 256. As long as you're holding those, you'll earn 1.5625% of distributed fees.

## 4 NFT OPPORTUNITIES AND SDK

As we mentioned before, Our goal is to introduce and support NFTs that come with holding benefits. Like discounts, promos, achievements, tickets, ... that come with separate values and are actually usable stuff.

We encourage Companies, Startups, Users, and, Developers to use the SDKs that we will publish for easing the integration to NFT World.

Achievements, rights, promos, tickets, and discounts that come with Long-Term advantages have a great opportunity to become NFTs and raise user engagement on different platforms.

Loyal Customer

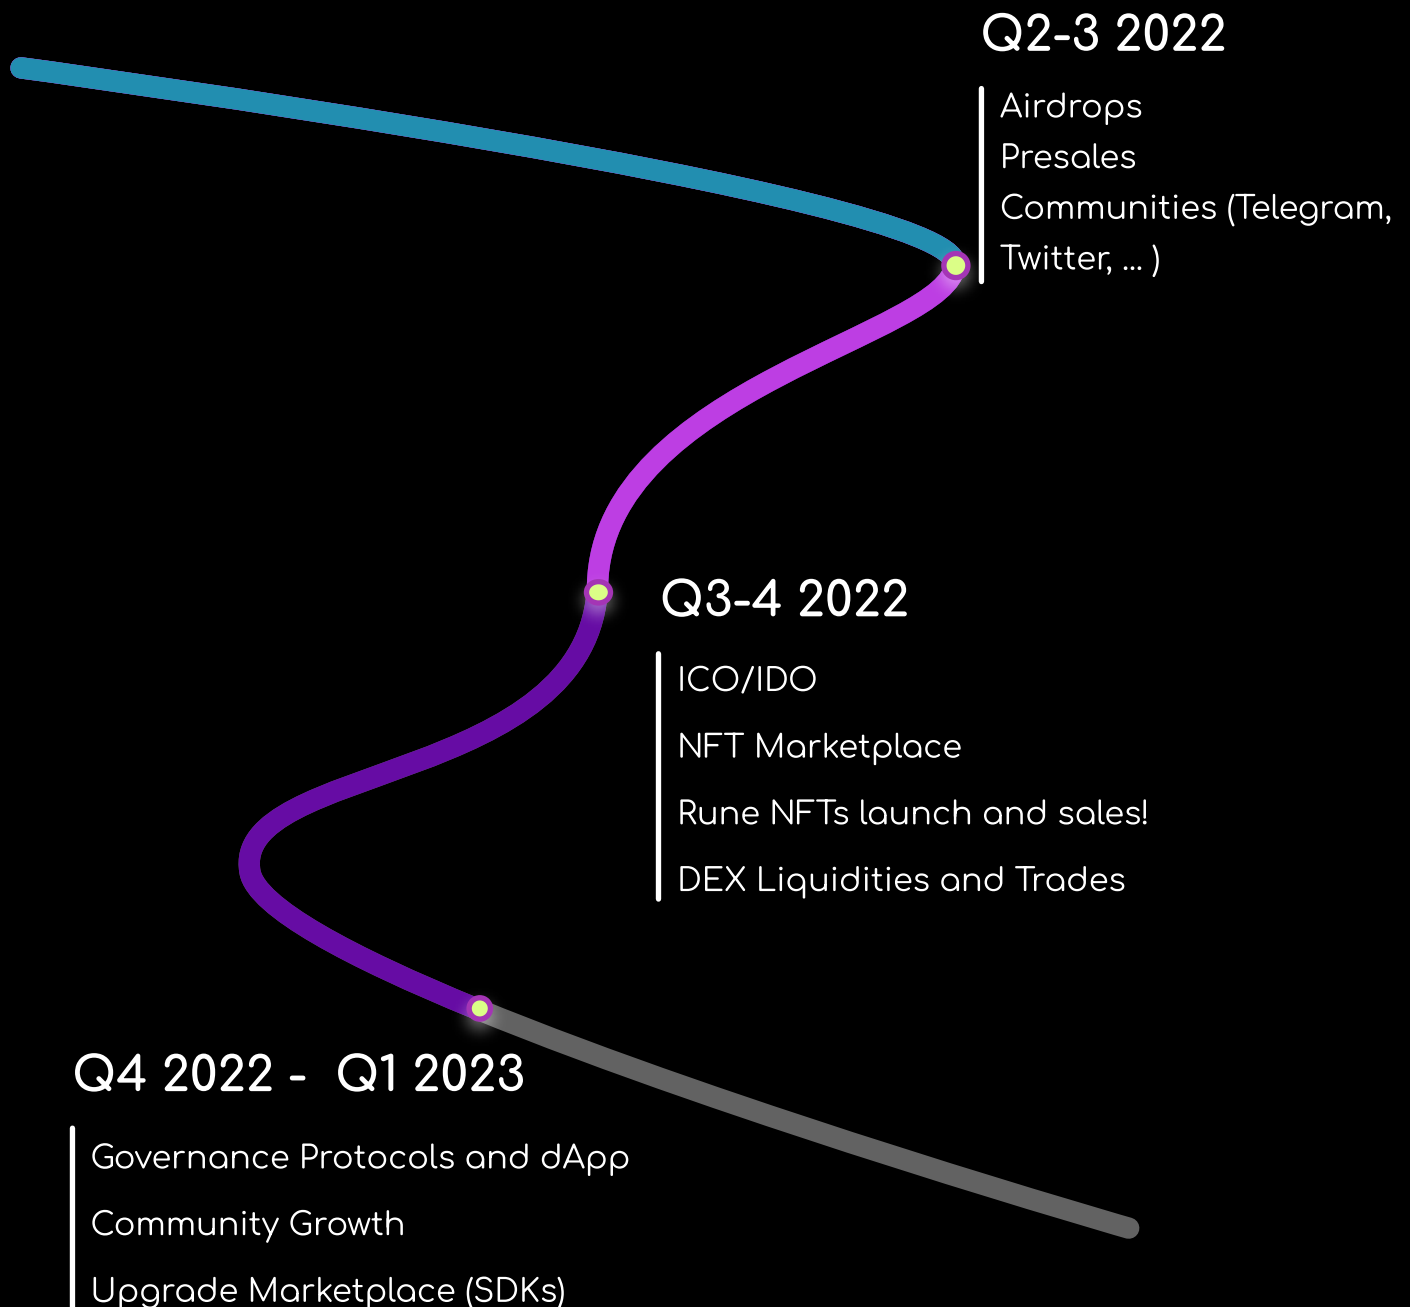

10% Forever discount

Shopaholic

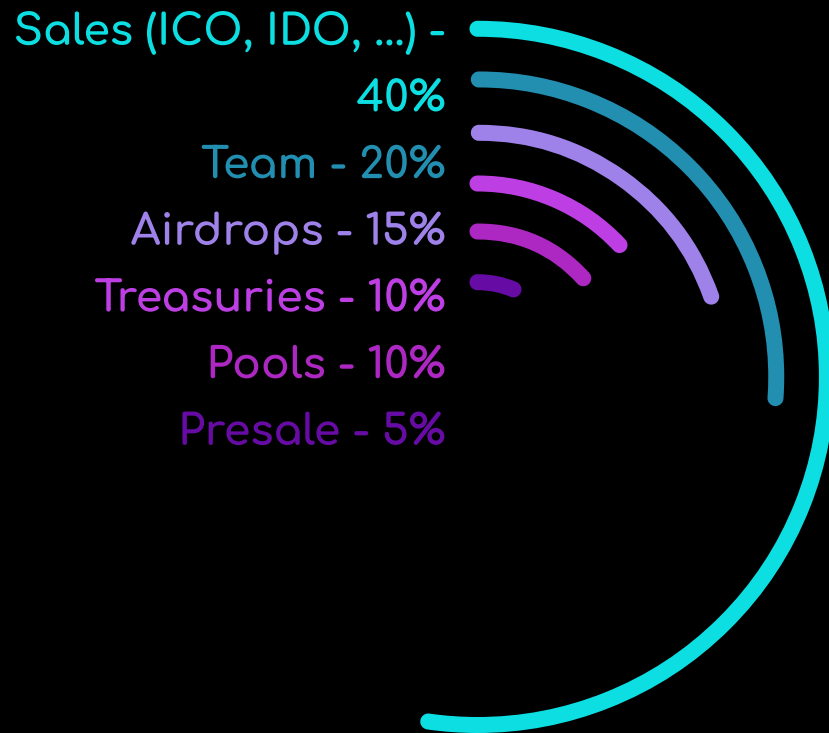

Forever Free Shipping

We will provide extensive SDK to interact and integrate with our platform, easing the available difficulties working with blockchain infrastructures.
